Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Burchett et al. (5,874,750). Burchett et al. disclose a nursing bottle with medication dispenser with the nipple replaced by a sipper (Figure 11) comprising;

a liquid containing cup or container or bottle having an open upper end;

a lid sealably connected onto the upper end of the cup or bottle;

the cup including an elongated medical cavity with a plunger and all functional limitations essentially as claimed (Figure 9 and col. 4, line 48-col. 6, line 13 and col. 7, lines 10-30).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Burchett et al. in view of Flink et al. (US 2004/0000551). Burchett et al. fails to specifically

Art Unit: 3739

disclose a raised lip formed around and upwardly extending from the upper distal end surface. But, Flink et al. disclose a trainer or sipper cup adapter lid (Figure 2) with a mouthpiece spout (16) having a number of apertures (18) set in a recess (17) to further minimize drips (the same structure as claimed and page 2, [0032 – 0035]. Therefore, at the time of the invention it would have been obvious to one of ordinary skill in the art to modify the device of Burchett et al., as taught by Flick et al., to provide a recess at the top of the sipper spout to minimize drips of the fluid being dispensed.

Conclusion

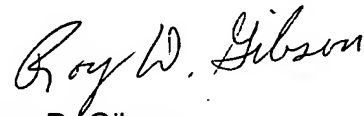

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Botts (6,126,679) disclose a nipple for use with liquid and medicine dispensing bottle (note the structure of the nipple in Figure 7, which resembles a drinking spout); and Marsden et al. (US 2005/0092754) disclose a sipper cup with medicine dispenser.
